

AUTOMOTIVE TECHNOLOGY, ASSOCIATE OF APPLIED SCIENCE

Students are taught to diagnose, correct and repair electrical, fuel, emissions, and mechanical problems found in today's modern automobile through classroom, laboratory, and field experience. Graduates are prepared for entry level positions as technicians in fleet service, manufacturer's dealerships, national oil company and transmission repair facilities, or independent garages. Course work prepares student for the National Institute for Automotive Service Excellence (ASE) automotive technician certifications. The AUTO Program is certified by the ASE Education Foundation in all eight ASE categories.

The General Motors Automotive Service Educational Program (GM ASEP) requires alternating school and General Motors dealership work experience sessions. In addition, GM ASEP students need to complete AUTO-1940 Automotive Field Experience I, AUTO-1950 Automotive Field Experience II, AUTO-1960 Automotive Field Experience III, and AUTO-2505 Automotive Electrical Diagnosis for General Motors ASEP. Please call the Automotive Technology department for more information.

The Ford Automotive Student Service Educational Training (ASSET) program requires alternating school and Ford dealership work experience sessions. In addition, Ford ASSET students need to complete AUTO-1940, AUTO-1950 and AUTO-1960 coursework. Please call the Automotive Technology department for more information.

These courses were re-classified as developmental mathematics by the state of Ohio in 2016. Tri-C established a 5-year transitioning window for students who had completed these courses prior to 2016 to apply them towards meeting graduation requirements, which expired in Summer 2021. It is highly recommended to see a counselor to determine the appropriate math required for your current major.
