

ELECTRICAL/ELECTRONIC ENGINEERING TECHNOLOGY WITH A CONCENTRATION IN DIGITAL COMMUNICATIONS

Graduates of the Digital Communications concentration in the Electronic Engineering Technology program can work as technical specialists in the broad and diverse field of communications, in such areas as installation, operation and maintenance of (principally) digital and analog communications systems. The program emphasizes both theory and application and consists of course work and lab work in basic electronic circuits, digital and microprocessor systems, networking, analog and digital communications circuits and system and communications media (fiber optics, broadband cable, twisted pair and microwave systems).

Program Admission Requirements

- High School Diploma/GED
- ENG-0995 Applied College Literacies or appropriate score on English Placement Test.
- MATH-0965 Intermediate Algebra or appropriate score on Math Placement Test.
- Receive a "B" grade or higher in EET-1161 Direct Current Circuits.

Program Learning Outcomes

This program is designed to prepare students to demonstrate the following learning outcomes:

- a. Demonstrate effective oral and written communications using appropriate technology and terminology to various audiences.
- b. Work independently and as an effective member of a team to complete projects.
- c. Explain professional, ethical and social responsibilities and the need for lifelong learning in the engineering profession.
- d. Apply current knowledge of math, science, engineering, fiber, radio frequency and networking technology to build/modify troubleshoot, install, operate and maintain equipment using schematic and/or mechanical drawings, instrumentation, productivity tools, safety and other appropriate standards.
- e. Sit for certification(s).
